

CLAIMS

1. A curable composition
which comprises the following components (A), (B) and
5 (C):
Component (A): A polyoxyalkylene polymer containing at least
one reactive silyl group at a molecular chain terminus;
Component (B): A polymer composed of acrylic acid alkyl ester
monomer units and/or methacrylic acid alkyl ester monomer units
10 containing, on the average, at least one reactive silyl group
in each molecule;
Component (C): An ionic surfactant.
2. The curable composition according to Claim 1
15 wherein the component (C) ionic surfactant is an anionic
surfactant.
3. The curable composition according to Claim 2
wherein the component (C) anionic surfactant is a
20 sulfuric acid ester salt type anionic surfactant.
4. The curable composition according to Claim 3
wherein the component (C) sulfuric acid ester salt type
anionic surfactant is a sodium alkyl sulfate type anionic
25 surfactant.
5. The curable composition according to Claim 2
wherein the component (C) anionic surfactant is a
fluorine-containing surfactant.
30
6. The curable composition according to Claim 5
wherein the component (C) fluorine-containing surfactant
is a fluorine-containing alkylsulfonic acid salt.
- 35 7. The curable composition according to Claim 1

wherein the component (C) ionic surfactant is a cationic surfactant.

8. The curable composition according to Claim 7
5 wherein the component (C) ionic surfactant is a nitrogen-containing compound.

9. The curable composition according to any one of Claims
1 to 8
10 wherein the content of the component (C) is 0.1 to 20 parts by weight per 100 parts by weight of the sum of the components (A) and (B).

10. A sealant for buildings
15 which comprises the curable composition according to any one of Claims 1 to 9.
